

MEMORANDUM

TO: Solid Waste File  
FROM: F. L. Stiegler, Jr. *FLL*  
DATE: October 10, 1969  
RE: Tybouts Corner Landfill - Odor Control.

A telephone call was made to Mr. Dick Bristow, Office Manager, regarding the past problem of odor control at the landfill. He advised me that the county had contacted the local representative of the Zep Corporation. The product that had been suggested for use was Zepoban. However, the representative of the Zep Corporation felt that this product was too strong and also contained other ingredients that are not required for this purpose. He suggested that another product be used, Deo-V, which he felt would be a more suitable product. This product smells and looks like vanilla. It is a liquid which is to be diluted in a 50 - 1 ratio for use of this nature. The county purchased a 20 gallon supply at a cost of \$277.00.

The odor problem which developed several weeks ago, was brought under control by placing several layers of compacted soil on the general area that was giving off the odor. It was difficult to pinpoint the exact area that was giving off the odor, however, the odor problem has not reoccurred and as a result the use of the odor control chemicals has not developed.
